

## 8.8 Wheel Spindle Elongation

### 1. Introduction

The axis of the grinding wheel diameter the same specifications and standards, replacement convenience, can be used as a small object plane polishing. Main purpose is to increase the long axis length, helps to avoid interference problems processing.

## 8.9 Plane Grinding Device

### 1. Introduction

Such devices have to do universal vise, the universal bench vise assembly to the bed, as its function and surface grinding ideal for smaller surface grinding.

### 2. Installation

Three methods of operation. This device is rotatable vise and a vise and the base may be able to single-handedly support between the seat formed by the rotation, rotating seat allows for horizontal and vertical vise 360 ° rotation, so the work can be simple to make a variety of angles clamping and grinding.
